Basic Programing

1. What is the data-type usually used in arithmetic operation? **Integer, float**
2. What is the data-type usually used in word and character? **String, Char**
3. What is the output of code bellow?

```java
class area {
        public static void main(String args[])
        {
                int a = 100 + 3 * 5 - 10 / 5;
                System.out.println(a);
        }
}
```

Output : 113

4. What is the output of code bellow?

```java
class average {
        public static void main(String args[])
        {
                int a = 0;
                for (int i = 0; i < 6; ++i) {
                        a = a + 2;
                }
                System.out.println(a/6);

        }
}
```
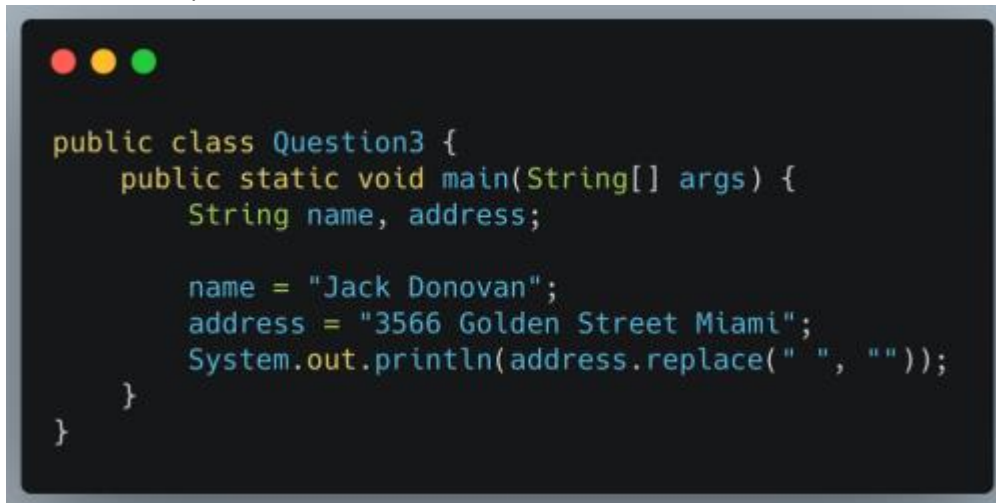

Output : 2
